

Burnout and Moral Distress Checklist and Worksheet for Managers – SAMPLE

PURPOSE: This document is prepared for managers and supervisors to assist with identifying signs of burnout and moral distress in their employees and provide approaches to address these concerns at the institutional level. The accompanying worksheet is a template to assist in discussing these issues with staff and developing a plan when signs are noted. These resources can also be used for educational purposes.

Definitions

Burnout	A multifaceted injury related to chronic workplace stress that affects the person’s well-being and quality of life. ¹
----------------	--

Moral Distress	Caregivers recognize the appropriate ethical action but are unable to act according to their conscience due to fear or external situations. ²
-----------------------	--

Classic Signs of Burnout

(as measured by the Maslach Burnout Inventory)³

Emotional Exhaustion	Depersonalization	Reduced Accomplishment
Ongoing exhaustion in one or more of the three levels: energy, emotion, spirit	Cynicism, detachment from job duties, low empathy, silence, passivity	Questioning self, doubting if work really makes a difference, loss of purpose

Classic Signs of Moral Distress⁴

Affective Symptoms	Cognitive Symptoms	Somatic Symptoms	Behavioral Symptoms
Frustration, anger, depression, powerlessness, helpless	Loss of self-worth, loss of sense of self	Fatigue, pain, sleeplessness, heart palpitations, nightmares	Gossip, tardiness, absenteeism, distancing, violence, avoiding work
