

Coverys Strengthens European Growth Ambitions with the Appointment of Ronan Gerety

BOSTON / DUBLIN, May 13 — Coverys, the Boston-based leading provider of specialty risk management and insurance solutions for medical and healthcare professionals, has today announced the appointment of **Ronan Gerety** as **Chief Executive Officer** of its European carrier, **Coverys International Insurance Company DAC**, strengthening its European Executive Board.

Based in Dublin, Gerety will be primarily responsible for driving Coverys' Continental European growth and further expanding the company's footprint with regional European brokers and MGAs.

Gerety brings extensive international specialty insurance experience to the role. He began his career in the Lloyd's market and with the Gerling Group in London, before spending the past 26 years in Germany, France, and the Netherlands in director and general manager roles with specialty insurance carriers including Catlin, Ironshore, and Liberty Mutual. Most recently, he held director and leadership positions with specialty cyber MGAs Cogitanda and Eye Insurance.

Coverys' appointment of Gerety reflects the company's continued commitment to investing in its Dublin and London platforms and accelerating growth across key European specialty insurance markets. **Ronan Gerety, Chief Executive Officer, Coverys International Insurance Company DAC, said:** "I am very excited to be joining Coverys at this important stage of the company's international development.

"Having first-hand experience of working locally with brokers and MGAs in major European retail insurance markets, I fully appreciate the added value that a mutual insurance carrier such as Coverys, with its 'A'-rated capacity and long-term growth strategy, can bring to those areas of the European retail insurance market where there is currently an absence of sufficient stable capacity and/or service."

Stef Raftopoulos Chief Executive Officer Coverys Limited, said: "Our vision is to become a leading European player in medical professional liability and associated healthcare risks and other classes complimentary to Group strategy.

"Having Ronan on board, with his extensive underwriting experience built across multiple markets, will be invaluable as we deepen our relationships with local European brokers and MGAs and continue to expand our presence across Europe from Dublin and London."
